

Good Morning Jossey:

...Lucille Roland, is a two time breast cancer survivor she had it once about thirty years ago, and she has just recently finished up with chemo therapy for the second time around. She is doing very well considering she is 80 plus years of age. So not only has she beat breast cancer before but she is doing it again. That is why I believe she should be on the calendar...

Lovingly,

Dr. Brida A. Coates
